Our organisation

Our organisation

We are the Environment Agency. We protect and improve the environment. Acting to reduce the impacts of a changing climate on people and wildlife is at the heart of everything we do. We reduce the risks to people, properties and businesses from flooding and coastal erosion. We protect and improve the quality of water, making sure there is enough for people, businesses, agriculture and the environment. Our work helps to ensure people can enjoy the water environment through angling and navigation. We look after land quality, promote sustainable land management and help protect and enhance wildlife habitats. And we work closely with businesses to help them comply with environmental regulations. We can't do this alone. We work with government, local councils, businesses, civil society groups and communities to make our environment a better place for people and wildlife.

Of course, none of this will be possible without the professionalism and dedication of our staff. We are committed to promoting equality and diversity in all we do, and to valuing the diversity of our workforce, customers and communities.

We're committed to helping our people to find new ways of working and to maintain our focus on creating a better place for people and wildlife. For more information on the Environment Agency and what we do, please visit:

www.environment-agency.gov.uk/aboutus

2. Salary and benefits

Join us in this role and you will enjoy the following benefits:

Grade Rate: £53,000- £55,000 per annum

Location: Red Kite House, Howbery Park, Benson Lane, Wallingford

Hours of work: 37 hours per week

Leave entitlement: Your leave allowance in this role will be 27 days plus bank holidays (pro-rata - if part time or an assignment).

We offer up to two days paid environmental outcome days each year. These give you the opportunity to take part in community activities with a clear environmental outcome for people and wildlife.

Pension: We will enrol you into the Environment Agency Pension Fund (EAPF) on commencing employment, if your employment contract is for 3 months or more. The EAPF is part of the Local Government Pension Scheme (LGPS). It is a career average scheme, which means you will build up benefits based on your pay each scheme year rather than your final salary.

We will base your pension contributions on your actual pay and you will receive tax and national insurance relief on your contributions. The pension contribution rates currently range between 5.5% to 12.5%. Whilst you are in the scheme we will also pay an employer contribution into your pension pot. We currently pay 18.5%, so this is a very generous scheme.

2. Salary and benefits continued

Work/life balance:

We support flexible working hours and practices to help you strike a good balance between your work life and your personal life. We will also encourage you to keep developing your skills and professional knowledge throughout your career.

Diversity:

We are committed to diversity and inclusion. We aspire to be the best employer in the country for equality, diversity and inclusion (EDI) and want all our staff to feel valued and respected and to see this as a great place to work. From our EDI executive champions to our EDI employee networks, everyone has a part to play to embed equality, diversity and inclusion in our organisation. Diversity: it's in our nature.

Lease car:

You may be eligible for a lease car, subject to meeting the requirements of our scheme.

Tenancy deposit loan:

Our Tenancy deposit loan scheme assists permanent employees and individuals employed directly by the Environment Agency on a Fixed Term Contract of more than 3 months, to cover the costs of a deposit for a privately rented home, which can sometimes act as a barrier to moving.

The scheme gives access to an interest free loan to pay for some, or all of, a deposit and can be paid back over a period of up to 12 months (or by the end of your fixed term contract, if you are employed for less than 12 months), directly from your monthly salary.

3. The role

Role

At the Environment Agency, we are responsible for regulating the disposal of radioactive waste across the whole of the nuclear industry in England. Whether it be an operational power station, or a new build project, our regulators work with nuclear operators to ensure the highest levels of environmental protection are achieved. As a nuclear regulator, you'll be at the forefront of this work. The role's not just about waste. As a regulator, you'll be expected to understand the businesses and technology you regulate, how they operate and the impact they could have on people and the environment.

We are looking for someone with experience of the nuclear industry and the determination and enthusiasm to drive environmental improvements. Site operators aren't the only people you'll deal with. At the Environment Agency, we are committed to the people and places we serve. Interaction with members of the public is an essential part of the role. You'll also need to be willing to play your part in responding to incidents both within the nuclear field and across other functions of our organisation.

You'll need a sound understanding of relevant legislation that you'll regulate against and an appreciation of the challenges the industry faces.

Principal accountabilities

- Undertake and support audit, inspection and enforcement at nuclear sites for processes regulated under the Environmental Permitting Regulations 2016 and other legislation.
- Advise a range of customers in the nuclear industry on the legislation we enforce and the standards we expect to see.
- Assist with Generic Design Assessment (GDA) of potential new reactor designs proposed for construction and operation in England, and assess their acceptability in terms of both radioactive and non-radioactive impacts. Work with overseas organisations including regulators as required.
- Determine, review and vary environmental permits, for existing sites.
- Undertake assessment of nuclear plant designers' and operators', optioneering and optimisation plans to ensure best available techniques (BAT) are employed.
- Influence operators to go beyond regulatory compliance to achieve enhanced environmental protection.

- Respond to UK and overseas radiation incidents as well as other incidents that the Environment Agency responds to.
- Lead or support project teams undertaking work on nuclear regulation to ensure consistency across the business.
- Explain our role to members of the public and answer their queries.

Qualifications, skills and experience

You should be educated to degree level, or have equivalent vocational experience. Professional membership of a relevant body is desirable.

We are seeking someone who has either experience within the nuclear industry or who has experience regulating nuclear sites. You'll have knowledge of the nuclear sector, but will be looking to further develop your skills and experience. You will have a sound understanding of modern environmental challenges and issues. You should be a great communicator and ideally have some experience of:

- managing a programme of work and delivering results
- working with industry to influence its plans and performance
- working with members of the public

Career opportunities

As a nuclear regulator, you'll have the opportunity to broaden your skills across a number of sectors of the nuclear industry. Some examples of the projects you might be involved in are provided below:

- **Generic Design Assessment-** The GDA process allows reactor designers to have their design assessed for environmental and safety acceptability, prior to committing to a specific site. GDA is a joint process with the Office for Nuclear Regulation, so you'd need an appreciation of safety and environmental requirements and how they interact. As well as the technical assessment, working with organisations from different cultural backgrounds and with different regulatory regimes, provides an additional challenge.
- **Nuclear new build** - Be part of a multi-disciplinary team ensuring that the environmental impacts of new nuclear power stations are minimised. This is a unique opportunity to make sure operators have the right equipment, arrangements and people, to ensure that the generation of radioactive waste and its impact are minimised. You'd also be working with experts in water management, habitats and planning within the Environment Agency to ensure that we deliver a co-ordinated approach to regulation.
- **Site regulation-** As a site regulator, you'd be expected to be the focal point for all Environment Agency interactions for your site. The challenges are as varied as the sites we regulate. You might be representing the Environment Agency with members of the public one day and investigating suspected offences the next. Understanding risks to the environment and members of the public is essential to providing a proportionate approach to regulation.

The Environment Agency is committed to ensuring all staff are supported in their career and technical development. You'll be given opportunities to attend training courses both internally and externally, from a range of expert training providers. You'll also have the opportunity to share your skills that you bring to the role and contribute to our own training programmes. Opportunities to progress to the role of senior nuclear regulator exist, subject to vacancies becoming available.

4. Further information

The Environment Agency values a diverse workforce and welcomes applications from all sections of the community who wish to join a workforce which embraces difference and welcomes everyone.

We aim to create and maintain a diverse workforce (including our Board and Executives) that better reflects the UK's economically active population. Therefore, we particularly welcome applications from Black, Asian and Minority Ethnic (BAME), disabled, female and LGBT+ candidates who are under-represented across our workforce.

The senior nuclear regulator role demands a flexible approach. You'll be expected to travel, predominantly in the UK, but occasional foreign travel may be required. In return, we offer a flexi-time system and can be flexible about your working hours, where family commitments require it. We will consider flexible working patterns for all our vacancies, including job share, so please include clearly any information regarding your preferred working arrangements on your application. Whilst your base must be at one of our nuclear hub offices, we also offer some flexibility around where you work from, which can be discussed should you be successful.

We will expect you to undertake a structured programme to develop your knowledge of the nuclear industry and your technical skills.

All roles are required to participate in our strategic involvement in nuclear emergency and incident response, including national arrangements for overseas and national nuclear incidents.

The role will be based across office and nuclear site locations in England so there will be frequent and occasionally unscheduled travel. Occasional overseas travel may be required. Nuclear sites are generally not conveniently accessible by public transport, hence the post requires a full UK driving licence.

Please note all successful applicants must undergo Baseline Personnel Security Standard (BPSS) checks prior to commencement of employment. This includes a basic criminal records check.

You are likely to require higher levels of clearance as a senior nuclear regulator. Should this be necessary, you will be advised of this during the recruitment process

Eligibility to apply and continuity of employment

Employment agency workers and contractors are considered to be external candidates and should therefore only apply for positions that are being advertised externally. They are also not eligible to claim continuity of employment should they be successful in securing a position with the Environment Agency.

If you have been a member of a Regional Flood and Coastal Committee in the last 12 months we will not be able to continue with your application based on agreed appointment rules related to employing ex-RFCC members. We would welcome an application from you once the 12 month period have passed.

4. Further information continued

Eligibility to apply and continuity of employment cont.

For applicants who currently work in local government or other bodies listed in the Redundancy Payments (Continuity of Employment in Local Government etc.) (Modification) Order 1999, you may be eligible for continuous service for the purpose of calculating any future redundancy payment. In addition, if you can demonstrate that you have worked at the Environment Agency immediately before joining the Civil Service and are now being re-employed by the Environment Agency within a period of three years of leaving, you may also count your Civil Service employment for the purpose of calculating your service related entitlements as outlined above. If you are unsure of your status then you should contact your own HR Team.

Pre-employment Checks

We apply the Baseline Personnel Security Standard (BPSS) check when recruiting staff to our posts. This includes a basic criminal records check.

For the great majority of roles in the Environment Agency this will be sufficient and only certain roles will require a higher level of clearance. Should this be necessary, you will be advised of this during the recruitment process.

Positions based at our London office or roles that require frequent travel to London require CTC level security clearance. This will be confirmed to you during the recruitment process.

Want to find out more?

To find out more about what it's like to work at the Environment Agency, please visit:
<https://www.gov.uk/government/organisations/environment-agency/about/recruitment>

5. How to apply

We use an online recruitment system. To make the application process simple and straightforward, and so that you know how it works and what we need from you, we've put together a few hints and tips. Make sure you have all the information you need about the vacancy. For some jobs, you'll be asked to download a candidate pack, like this one, where you'll find specific application instructions.

The first thing you need to do is sign up to our recruitment system. You will need a valid e-mail address to log in and apply for opportunities, as all communication from us will be via e-mail. You can do this via the vacancy you are interested in by selecting '**Apply**' at the bottom of the advert.

Once you've clicked this link you'll then be asked:

- Do you have the right to live and work in the UK?
- Do you have the required qualifications or equivalent experience, which were stated in the job advert?
- Are you currently an employee of this organisation?

Simply answer yes or no and you can carry on with your application. You'll then see the '**Register**' page. Simply complete the details and select '**Submit Registration**' and register to the system. You only need to sign up to the system once; you'll just be able to login next time.

When it comes to the actual application, you need to fill out each section, please be aware that the system will automatically time out if you are inactive for more than 60 minutes. This will result in any unsaved information being lost so make sure you save what you are doing regularly. Once you've finished, your details and information will be saved on the system for any future applications – of course, you can edit your details at any point.

5. How to apply continued

When you apply to the Environment Agency for a job we will ask you to provide your personal data on our application form. We need this information so that we can establish your identity and your right to work in the UK.

You can read our Data Protection Statement on the application process page of our recruitment system. It is also available for reference on each page of the actual application.

Competence Questions/Statement

We're keen to know what makes you right for the job you're applying for and why we should ask you in for an interview. The competence questions/statements are your chance to convince us!

You should demonstrate how your skills, qualities and experience meet the requirements of the job (as described in the job advert and candidate pack). And instead of simply telling us, show us: use real life examples of where you've used a certain skill or how you've practically applied your experience.

There's a 250 word limit per competence including spaces. It's a really important part of the selection process so make sure you keep your statement relevant and concise. Think about what we need to know about you and what you'd bring to the role and our organisation.

Application questions

For some roles, we'll ask you some specific questions, like if you have a preferred work location. If you're disabled and you'd like to be part of our Guaranteed Interview Scheme, you can add this information in here.

5. How to apply continued

Equality and Diversity

We're committed to reflecting the communities we serve and we'd like you to tell us about yourself and your background.

Submitting your application

Once you've filled out and completed everything, you'll be prompted to submit your application. Simply click the button and you're done.

Please be aware that once you've submitted your application, with the exception of the 'Personal Details' section you will not be able to edit your application further. If you decide to withdraw your application, you will not be able to submit another application for the same vacancy.

If, at any stage, you have questions or problems, please contact the recruitment team on 0845 241 5350 or email ea_recruitment@sscl.gse.gov.uk

Setting up 'job alerts'

If you have been unsuccessful with your application you can set up email alerts for future vacancies. You will automatically receive an email when a job that matches your criteria becomes available. To do this simply click on '**create a new job alert**', enter your job criteria and save.
