

Additional Role Information

Programme and Contract Management (PCM) is responsible for delivering our larger scale, high profile capital projects in a continually improving sustainable way, mainly within our flood risk asset management programme; from multi-million-pound programmes to ground-breaking, award-winning projects. The team you will be working in promotes a supportive environment where each team member's contribution is valued. Our strong, multi-disciplinary teams manage projects throughout their lifecycle to create climate resilient places and deliver wider environmental improvements.

PCM operates through strong and well-qualified teams. A wide range of project and contract management skills and experience means we can take on projects from a range of internal and external clients. We manage projects throughout their lifecycle: from initial strategic planning through to implementation and delivery of the final output.

We have a national capital programme of projects looking up to six years ahead. We agree our programme of projects in detail at the start of each year and monitor these closely, as well as keeping an overview of projects continuing from previous years or new projects starting in the future. We review and adapt our programme of projects as the current year progresses, to accommodate short-term requests not apparent at the start of the year.

The overarching objective of the Investment Programme is to help create climate resilient places, and to ensure that today's growth and infrastructure is resilient to tomorrow's climate. As such, the Investment Programme aims to support the economy and society whilst delivering more environmental outcomes for every pound spent.

Role capabilities

Key capabilities for the 'Assistant Project Manager' role include:

- Programme & Project Management
- Communicates effectively
- Achieves results

These will be assessed via your answers to capability-based questions in your written application. If you are shortlisted for interview, additional capabilities may be assessed but will be clarified before your interview.
