## Job Family Role Profile: Technical & Scientific Services, Grade 5

- *This is a generic role profile. It aims to outline the requirements of roles broadly within the job family and grade detailed above rather than provide the requirements of a specific job*
- *This profile should be used as a template to help 'frame' the right size and shape of work undertaken locally*
- *For further guidance on how to use job family role profiles effectively, please see the Easinet*

### Job Family Description

These roles carry out technical and scientific services, usually acting as service providers in areas of specialist expertise, to support the Environment Agency in the delivery of its primary business activities.

Typically, these roles provide scientific advice, data or analyses to ensure our decisions are based on sound evidence and are rooted in good practice.

The key factor distinguishing roles in this job family from other technical roles in the organisation is that they usually provide technical and scientific know how to a range of customers and areas, both internally and externally.

### Purpose Statement

**The contribution and key purpose of roles in this job family at this grade. It indicates the typical degree of independence these roles hold. Note: names of roles are intended to illustrate the type of roles at this grade and are not related to job title.**

Acts as specialist or team leader. Role accountabilities can be interchangeable depending on the team and work being delivered but the overarching theme of all roles is leading technical or scientific knowledge within the organisation to ensure our operations are based on sound evidence and information.

Specialist roles contribute to delivery by acting as the technical advisor within specific area of expertise. Team leader roles focus on the management of the team's delivery.

Roles may be field based or office based.

Some roles in this job family, at this grade, participate in incident response as part of their accountability.

Works within a broad frameworks and outputs are subject to review.

## Representative Accountabilities

**The key areas of work and responsibilities for these roles. Points identify typical areas of outputs and suggest anticipated results but are not exhaustive or specific.**

### **Specialist:**

- Provide technical and scientific advice and support to internal teams and external partners in line with defined business plans and Environment Agency objectives.
- Guide and advise others on the resolution of technical issues, ensuring decisions are made on sound technical grounds and deliver required outcomes. In some cases this may require the provision of specialist services in response to incidents and other high priority activities.

### **Team leaders:**

- Responsible for a team, providing leadership, directing and prioritising delivery of specific technical or scientific activities in line with defined plans. Identifies risks to the delivery of priorities, making appropriate actions to resolve issues.
- Recruit, motivate and develop team members to ensure effective delivery of technical or scientific activities. Ensures appropriate skill levels are developed and maintained and team performance is optimised in line with specified team goals.

### **All roles:**

- Develop and maintain relationships across the organisation, and sometimes wider, in order to influence effective ways of working based on technical or scientific evidence.
- Keep up to date on changing technology and scientific developments and share knowledge with others to promote best practice within the organisation and externally.
- May participate in or lead projects to bring about change and improvement, and support the best environmental outcomes. Typically these will involve implementing technical / scientific developments for the organisation or introducing new ways of working.
