## Job Family Role Profile: Asset Management, Grade 4

- *This is a generic role profile. It aims to outline the requirements of roles broadly within the job family and grade detailed above rather than provide the requirements of a specific job*
- *This profile should be used as a template to help 'frame' the right size and shape of work undertaken locally*
- *For further guidance on how to use job family role profiles effectively, please see the Easinet*

### Job Family Description

Roles in this family manage the whole lifecycle of our flood and coastal risk management assets, i.e. from planning and delivery, through to upkeep and eventual decommissioning.

There are a wide range of skills in this job family but they are identified by their contribution to the asset management life cycle. Roles here can be field based, for example in building or maintenance of structures and plant, or office based such as planning and managing the delivery of assets and the preparation or the analysis required to carry out asset management effectively.

### Purpose Statement

**The contribution and key purpose of roles in this job family at this grade. It indicates the typical degree of independence these roles hold. Note: names of roles are intended to illustrate the type of roles at this grade and are not related to job title.**

Acts as officer or analyst, providing expertise or advice, managing and/or delivering assets, in line with the Environment Agency asset management strategy.

Roles may be field based, planning and undertaking activities such as inspection, monitoring and maintenance, or office based providing the data, analysis and advice to support the asset management lifecycle.

Most roles engage with external parties in delivery of their objectives, managing relationships and representing the Environment Agency.

These roles have autonomy to work within established processes and procedures but refer to others and are subject to supervision.

## Representative Accountabilities

**The key areas of work and responsibilities for these roles. Points identify typical areas of outputs and suggest anticipated results but are not exhaustive or specific.**

- Guides, advises and supports team members and others, to ensure that decisions are made on sound technical grounds, are in line with required legislation / best practise, and minimise risks associated with our assets. Works proactively with others to identify and resolve issues.
- Plans and manages progress of work and / or projects. This may involve managing internal or external resources to ensure progress is in line with plans. Identifies gaps in the delivery of priorities and takes appropriate action to resolve issues.
- Builds and sustains effective relationships with colleagues, internal/external customers, partners and stakeholders to understand issues and provide an effective response / steer for their needs.
- May provide professional / technical expertise to identify appropriate investment projects or plans to deliver the outcomes of the Asset Management Strategy.
- May lead in the collection of data and / or maintenance of our assets, or enable proactive management of assets to ensure risks are mitigated.
- May produce analysis/reports and make recommendations informing asset management activities and decisions.
- May act as lead in a specific area of expertise; keeping up to date on legislation / policy and current practices. Mentors staff equipping them with the knowledge and skills to deliver work in the most effective and efficient manner.

## Typical skills, knowledge and experience

**The knowledge, skills and experience indicated usually reflect the minimum levels required for competent performance in the role. Due to the generic nature of job family profiles, detailed requirements need to be specified in supporting documentation, such as the advert.**

- Roles require specialised knowledge based on experience and / or suitable qualifications. Depending on the role this usually entails engineering, technical, project or analytical skills relevant to role requirements.
- Requires depth of knowledge that enables working authoritatively within an asset management environment.
- Required to use judgement / experience to tackle routine issues, may seek advice on more complex problems.
- Possibly requires project management or relevant operational skills.

Grade : 4	Profile reference:AM04
Doc Version: V1	Date latest version: 22/05/2017

- Roles may require a graduate qualification in a relevant field, relevant vocational qualifications or equivalent experience.

## Expectations for these roles

**Sets relevant expectations for roles by grade, including health and safety, equality and diversity, communications required, quality assurance and level of organisational wide understanding required for role. This section is common to all job families at this grade.**

- Encourages and develops a positive health, safety & wellbeing culture within the team. Delivers work programmes safely.
- Promotes inclusion by respecting differences in our workforce and works to build a supportive & engaging workplace.
- Able to communicate with a wide audience and explain technical / regulatory issues to non-technical colleagues and partners.
- Uses judgement in delivery of asset management activities that meet the needs of customers and fulfil required standards and service levels.
- Understands colleague priorities, operational context, and their contribution to environmental outcomes. Able to describe wider organisation and its services to others.

## Grade Distinction

**Outlines the difference in expectations and/or accountabilities for roles at grade above and below this profile. This section is common to all job families at this grade.**

### Roles at grade 3:

- Work within well-defined procedures where decision making is based on a range of options.
- Undertake interpretation and straightforward analyses of information and data.
- Usually co-ordinate and collate data and information.
- Interact with customers and stakeholders rather than 'own' or manage relationships.
- Usually require specific on the job training and / or experience to carry out routine activities, whereas roles at this grade usually require background knowledge associated with

### Roles at grade 5:

- Manage a range of issues requiring consideration of broader practices rather than process or policy.
- Require a level of specialist knowledge that is usually gained through extensive practical experience or academic qualification.
- Usually require a strong grasp of theoretical principles determining activity within their field of activity.
- Are likely to lead the production of documentation and advice.
